Period 2706 (23 August 2026 to 19 September 2026)

* Full cancellations are trains that ran less than half booked mileage, counting as 1 cancellation. Part cancellations are trains that ran more than half booked mileage but did not call at all booked stations, counting as 0.5 cancellations.

~ Pre-cancellations, also known as P-coded cancellations, refer to planned cancellations made to passenger services before 22:00 on the day prior to operation, due to the availability of train operator staff or rolling stock, Network Rail staff or infrastructure, or severe weather (among other causes). They are included in a revised timetable, and therefore may not appear in on the day cancellations figures.

Responsibility for attributed punctuality failures at every recordable station stop within 3 or 15 minutes

Comparison of Period 27/06 to the Moving Annual Average

Avanti West Coast Services

Period 2706 (23 August 2026 to 19 September 2026)

Cancellations measured as percentage of trains planned (includes full and part cancellations). Full cancellations are trains that ran less than half booked mileage, counting as 1 cancellation. Part cancellations are trains that ran more than half booked mileage but did not call at all booked stations, counting as 0.5 cancellations

Punctuality measured as percentage of station stops (origins, arrivals and termini).

Short Formations % = Percentage of trains ran which had less capacity versus the declared plan. Services cancelled are excluded.
